INTELLIGENT POWER METERS

REPORT  REDUCE ELECTRICITY CONSUMPTION

POWER METERS

To help provide an overview of electricity consumption on the construction site, we have now launched the **Intelligent Power Meter**.

If you have rented an intelligent power meter, you will find it under **Energy (Energi)**.

The screenshot displays the GSV web application interface. The top navigation bar includes the GSV logo, 'Mit GSV', and various menu items like 'Produkter', 'Gren omstilling', 'Voeres løsninger', 'Kontakt', and 'Om GSV'. A user profile for 'Marianne Jensen' is visible in the top right corner.

The main content area is titled 'Energi' and features a sidebar with navigation options: 'Dashboard', 'Projekter', 'Materiel', 'Energi' (highlighted), and 'Økonomi'. The 'Energi' section is active, showing a sub-menu with 'Overblik', 'CO2 data', 'Skure', 'Elmålere', and 'Rapportering'. The 'Elmålere' sub-menu is selected.

The 'Eltavler' section displays a bar chart titled 'Elforbrug fra elmålere' with a 4% increase. The chart shows kWh used over a period of 6 days. The total kWh used is 28,4. The period is set to 'Aug. 19 2023 - Aug. 25 2023'.

Below the chart, there is a table titled 'Fremhævede elmålere' (Highlighted meters) with columns for 'MATERIEL', 'SAGSNUMMER/ADRESSE', 'BRUGT KWH', and 'TIDSSTYRING'. The table lists three meters:

MATERIEL	SAGSNUMMER/ADRESSE	BRUGT KWH	TIDSSTYRING
Elmåler på Christianshavn Elmåler 63 amp ID 058-875-012	954045 Langebrogade 6A 1114 København K	1923 10% ↑	✓ Aktiv
Byggeplads på Sjælland Elmåler 63 amp ID 046-4530-619	954032 Hundigevej 85 2760 Greve	1923 10% ↑	✓ Aktiv
Eltavle 23 på vej X Elmåler 63 amp ID 046-4530-619	859963 Violvej 60 3500 Værløse	800 10% ↓	✓ Aktiv

POWER METERS

You can see how much electricity you have used in the selected period.

You can name your power meter so you can better keep track of which power source you are measuring.

You can set up time scheduling for your power distribution boxes – for example, so they can switch off a container with a heater when it is outside working hours.

The screenshot shows the GSV Energi dashboard. At the top, there is a navigation bar with 'Mit GSV', 'Produkter', 'Gren omstilling', 'Vores løsninger', 'Kontakt', and 'Om GSV'. A user profile for 'Marianne Jen' is visible on the right. The main content area is titled 'Energi' and includes tabs for 'Overblik', 'CO2 data', 'Skure', 'Elmålere', and 'Rapportering'. The 'Eltavler' section shows a bar chart for 'Elforbrug fra elmålere' with a total of 28,4 kWh used. Below this is a table of 'Fremhævede elmålere' with columns for 'MATERIEL', 'SAGSNUMMER/ADRESSE', 'BRUGT KWH', and 'TIDSSTYRING'. The table lists three active meters with their respective IDs and addresses.

MATERIEL	SAGSNUMMER/ADRESSE	BRUGT KWH	TIDSSTYRING
Elmåler på Christianshavn Elmåler 63 amp ID 056-875-012	954045 Langebrogade 6A 1114 København K	1923 10% ↑	✓ Aktiv
Byggeplads på Sjøslønd Elmåler 63 amp ID 046-4530-619	954032 Hundigevej 85 2760 Greve	1923 10% ↑	✓ Aktiv
Eltavle 23 på vej X Elmåler 63 amp ID 046-4530-619	859963 Violvej 60 3500 Værløse	800 10% ↓	✓ Aktiv

POWER METERS

Each power meter can have 2 time intervals per day.

You can set up a schedule for all your power meters at once. Afterwards, you can adjust the individual meters' schedules if needed.

If you do not set up a schedule, the meter will stay on all day and behave like a "regular" power meter.

If you press the trash bin icon and delete all time intervals, the power meter will be off for the entire day.

Download rapport 📄

You can easily generate a report of your electricity consumption under the **Reporting tab**

Choose **Power Meters (Elmålere)** in the dropdown to select what you want to report on.

If you have created a project, you can select it here – otherwise, you will see all power meters.

When you have made all the relevant settings, press **Download report**, and we will generate a CSV file for you.
